

The Daily Planet Features Cold Water Dispersant Research at Ohmsett

LEONARDO, NJ – On March 24, 2014 Ohmsett was featured on Discovery Channel Canada's program The Daily Planet. The segment highlights the Bureau of Safety and Environmental Enforcement (BSEE) Cold Water Dispersant project where researchers examined the effects of dispersants on Alaskan crude oil in cold water. The program can be viewed at <http://watch.discoverychannel.ca/#clip1075989>. The Ohmsett segment starts around the 6:45 mark.

###

Ohmsett, The National Oil Spill Response Research & Renewable Energy Test Facility, is one of the largest outdoor saltwater wave/tow tanks in North America and is designed to evaluate the performance of full-scale and meso-scale equipment under realistic but safe environmental conditions. The facility, managed by BSEE and operated by MAR, Incorporated, is located at the Naval Weapons Station Earle Waterfront in Leonardo, New Jersey (about one hour drive south of New York City).
